Sam Smith

Elutheric 80.1%

Musician

Sam plays the piano - currently studying materials science as an undergraduate.

New York

Culture Hub

Auxonic 80.1%

Cultural discoveries in this city inspire technical marvels across the east coast.

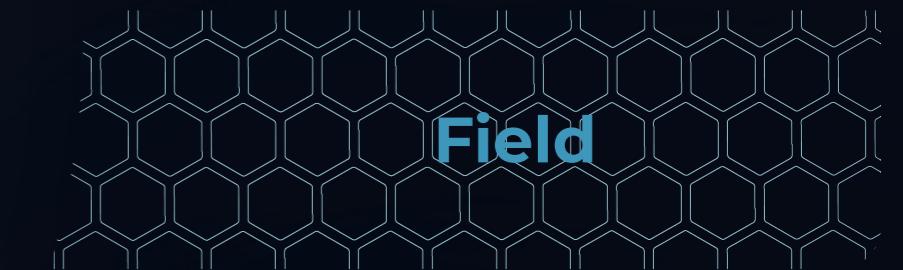

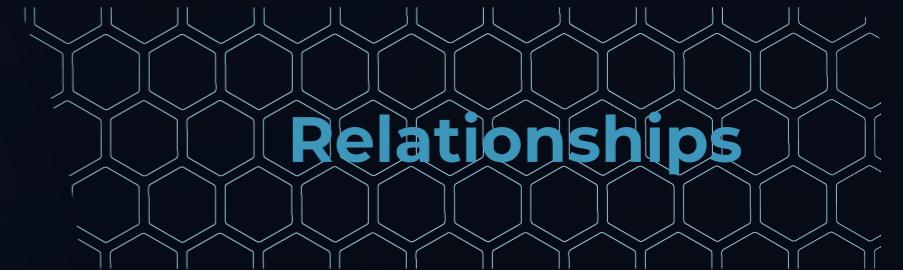

Sam Jones

Biotic 80.1%

Scientist

As a biologist, Sam focuses her studies and research on butterfly species.

Sam Smith
Musician

(301) 471.3091 [PDF](#)
samsmith@gmail.com
<https://www.samsmith.com>

Sam plays the piano - currently studying materials science as an undergraduate. Sam currently is enrolled in his senior year at Frostburg University in Maryland. While in high school, Sam developed an interest in materials science - the properties of piano keys inspired him design a more tactile piano key. Sam's senior thesis measures the improved dexterity of piano playing - he describes his research in documents that are found on his website.

MINIMUM VIABLE COMPLETION

81.2%

Psihesion Suggested

After completing the minimum amount of research agreements, new projects could be created to include the remaining agreements.

Given the information provided in this project plan, completing 81.2% of the agreements allows us to stay within the margin of error for the predicted rate of success.

[OTHER GOALS](#)

PROJECTS

[BACK](#)

Psihesion increases when people work on projects related to our shared goals. Implicitly, people volunteer for projects recommended to them. People suggest and accept projects they enjoy. Recommendations are based on their expertise and their predicted enjoyment.
